

G THULASIRAM

Network Engineer II | Test Automation Specialist

Hyderabad, India • +91 7095444102 • gtrreddy5@gmail.com • linkedin.com/in/thulasiramreddy

PROFESSIONAL SUMMARY

Results-oriented **Network Engineer II** and **Test Automation Engineer** with **5+ years of experience** in **4G/5G telecommunications**, **network provisioning automation**, and custom **Python tool development**. Proven track record at **Verizon (GNM-Network-provisioning)** and **Tech Mahindra (AT&T; projects)** in gathering automation requirements from business and leadership teams, designing, developing, testing, deploying, and delivering live demos for enterprise network workflows. Specialized in **5G Standalone (SA) & Non-Standalone (NSA)** core architectures, **LTE/VoLTE/IMS call flow validation**, **3GPP protocol testing**, **GitLab CI/CD**, **Jira ticket handling**, and **Django web dashboard development**.

TECHNICAL SKILLS

Programming & Web:	Python, Django, JavaScript, HTML5, CSS3, SQL (MySQL)
Network Domains & Protocols:	4G LTE, 5G (SA/NSA) Core, Network Provisioning (GNM), Call Flow Validation, IMS Core, VoLTE, SIP, S1AP, NGAP, SGSAP, GTPv2, DIAMETER, 3GPP Standards
Automation & Testing Tools:	ANT (Automated Network Testing), ATP, MEx, Wireshark, IRIS, NGXP, RADCOM, IXIA, Landslide, PuTTY, HSS, UDR
Developer Tools & Operations:	GitLab, Git, Jira (iTrack), Zephyr (ZETM), VS Code, Jupyter, Linux CLI, Agile/Scrum

PROFESSIONAL EXPERIENCE

Verizon Communications — *Hyderabad, India*

May 2026 – Present

Network Engineer II — GNM-Network-provisioning

- **Requirement Gathering & Stakeholder Collaboration:** Gather new automation requirements directly from business and leadership teams, analyzing operational workflows to design end-to-end network provisioning solutions.
- **Automation Design & Implementation:** Design, develop, test, and deploy robust Python-based automation frameworks tailored for the GNM-Network-provisioning domain.
- **Live Demos & Technical Presentations:** Conduct live technical demonstrations of newly deployed automation tools for leadership and business teams, showcasing ROI and feature efficiency.
- **CI/CD & Version Control:** Manage release repositories, execute daily code pushes, and maintain code quality using **GitLab** CI/CD pipelines.
- **Incident & Ticket Management:** Resolve network provisioning tickets, operational requests, and bug reports using **Jira** while maintaining strict SLA standards.

Tech Mahindra Ltd — *Bangalore, India*

May 2021 – Apr 2026

Test Automation Engineer (AT&T; Telecom Projects)

Project: Test Case Automation using ANT (AT&T;) | Aug 2023 – Apr 2026

- Engineered CLI-based Python scripts to automate testing across 4G/5G network nodes, real UE devices, and traffic simulation platforms (IXIA, OpenTool, Landslide).
- Integrated custom Python test scripts with the Automated Network Testing (ANT) tool, expanding automated test coverage across 5G and LTE feature sets.
- Utilized Git for daily code pushes, peer reviews, and branch merging to maintain clean repository standards.
- Managed issue resolution, ticket tracking, and feature validation using Jira within an Agile-Scrum environment.

Project: ANT Regression Testing & Call Flow Validation (AT&T;) | Dec 2022 – Aug 2023

- Executed end-to-end regression testing and call flow validation (registration, call setup, data transfer, handovers) for 4G/5G networks per 3GPP standards.
- Validated VoLTE and IMS core elements (P-CSCF, I-CSCF, S-CSCF, AS, HSS) and performed deep-packet log analysis using Wireshark, IRIS, RADCOM, NGXP, and PCAP.
- Validated core telecom protocols including SIP, S1AP, NGAP, SGSAP, GTPv2, and DIAMETER.
- Managed defect tracking and vendor resolution via Zephyr (ZETM) and iTrack Jira.

Project: E2E 5G Standalone Core Network & Automation Portal (AT&T;) | May 2021 – Dec 2022

- Architected and developed a web-based test automation portal and health reporting dashboard utilizing Python, Django, HTML, CSS, JavaScript, and MySQL.
- Automated data cleaning, manipulation, and quality assurance workflows using Pandas and NumPy to process unstructured test logs.
- Generated interactive visualizations for 5G Standalone (SA) and Non-Standalone (NSA) network health reports using Plotly, Dash, Matplotlib, and Seaborn.
